

KOPOBOX mini

KOPOS KOLÍN a.s. presents completely new system with its Multi-Purpose KOPOBOX Mini Box. It is a versatile device box for modular data and power sockets. KOPOBOX mini can be used with PK 110X70 D and PK 110X70 D HF Parapet Ducts which form part of the product portfolio of KOPOS KOLÍN a.s.

The boxes may be used in plastering as well, by the same way as regular boxes, and there are particularly suitable for use in plasterboard walls and in furniture sector. KOPOBOX mini has its use also for floor boxes in rooms with lighter traffic, in poured concrete floorings and in hollow floor systems.

KOPOBOX mini splits into 3 configurations for its various areas of use:

KOPOBOX mini L

- halogen-free material (PC)
- dimensions: 175 x 80 x 75 mm
- enables installation of modular devices in 3 pcs of 45X45 or 6 pcs of 45X22.5

This set is adapted for mounting into furniture, hollow walls or double floors of thickness of 6 to 38 mm. Its installation is fast and straightforward. It is done by help of special fixing lugs. The bottom covering box permits fixing cables to prevent them from being turn out. Fixing clamps and screws are part of the set.

KOPOBOX mini B

- halogen-free material (PC)
- dimensions: 175 x 80 x 68 mm
- enables installation of modular devices in 3 pcs of 45X45 or 6 pcs of 45X22.5

This set is adapted for installation under plastering of in poured concrete floors where installation box is fixed firstly in a gypsum bed, and is then fitted with the frame of the KOPOBOX mini box.

KOPOBOX mini P

- halogen-free material (PC)
- dimensions: 175 x 80 x 50 mm
- enables installation of modular devices in 3 pcs of 45X45 or 6 pcs of 45X22.5

It is highly efficient set for the PK 110X70 D and PK 110X70 D HF parapet ducts at which it is fixed, similarly to the KOPOBOX mini L, using the special fixing lugs. The construction of frame permits the parallel use of shielding duct which can be mounted under KOPOBOX mini P.

Covers of these sets are fitted with simple locks holding the cover in closed position. When the lock is released, the cover opens automatically and stays open because of dedicated spring.

KOPOBOX Mini can be released for sale from May 2013.
